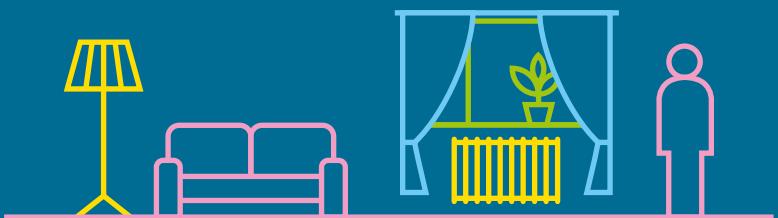
ACCELERATE SUNSHINE
SAVE YOUR BUILDING
BY SAVING ENERGY

SAVE YOUR BUILDING
BY SAVING ENERGY

DO WELL BY DOING GOOD:

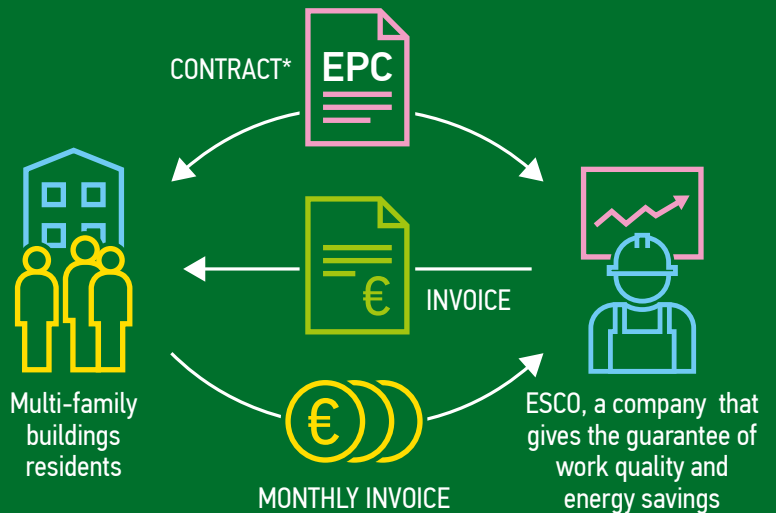
Finance and execute energy efficiency improvement measures and deep renovation of multi-family and public buildings in Latvia!



Join Jūrmala, Bauska, Ādaži and Tukums to:

- Guarantee a comfortable environment for homes in multi-family buildings
- Prolong the building's life by at least 30 years
- Attract private investment to renovate while reducing the carbon footprint

THE SUNShINE DIFFERENCE



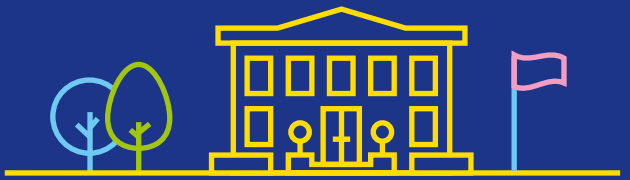
*EPC - energy performance contract, is a contract between a professional – service, maintenance, or engineering company and a building association, guaranteing up to 30 years of quality and savings.

HOW DO WE ENSURE SUSTAINABILITY TO OUR CONCEPT

SUNShINE concept proves to be efficient:

- Refurbished buildings after 5 years of renovation save at least 55 % of energy
- Lower renovation costs
- Improved resident's payment quality

*In total in Latvia there are more than 30 000 multi-family buildings who need to be renovated



MUNICIPALITIES PLAY A KEY ROLE IN THE LOW-CARBON ECONOMY:

- Provide best practice while refurbishing public buildings with EPC
- Adopt regulations and advocate for appropriate legislation
- Motivate residents to renovate their homes while transforming into Smart cities
